

The technology that powers presentation and collaboration is finally catching up with the spirit of luxury. For too long, professional audiences have been confined to boardrooms or presentation halls in order to be subjected to death by PowerPoint.

The **TAG TECSLATE** is redefining that experience by letting your imagination become reality.

Imagine cruising in a private aircraft at 40,000 feet while courting new business associates with the latest in innovation; or yachting over crystalline seas while delivering a cutting-edge proposal on the top deck. The TAG TECSLATE makes these daydreams real, and many more.

Much more than just an extremely large tablet, the TAG TECSLATE features a 65- or 84-inch interactive touchscreen that makes information come to life, anywhere. Unlike conventional projectors or monitors, it is fully integrated with an onboard Wifi-enabled PC running the latest Microsoft Windows™ software, so merging with the luxe life is seamless.

Able to be wall mounted vertically and horizontal or to remain mobile on a custom stand in any top-shelf environment, the TAG TECSLATE allows the presenter—and even the audience—the opportunity to touch, move, scroll, play, highlight, or draw the way to greater enlightenment. Whether it's in the boardroom or soaring through the air, the intuitive design—featuring an Intel® Core™ i7 processor with 16 GB of memory and 1 TB hard drive or 256 GB SSD of on-board

storage—will make a wizard of the most tech-challenged user and will delight even the most advanced tech guru.

With this device there's no fear of running into technical difficulties. Whether you're navigating between images and video, scrolling through specs, or running 3-D simulations, the TAG TECSLATE makes it fast and easy. Move effortlessly between computer capabilities, a 200 Channel 4K Digital LCD TV, and interactive TECSLATE Pro whiteboard software. Such versatility ensures that upscale and grand surroundings remain technologically uncluttered.

Not only is this the most intuitive piece of technology for the presenter's tool kit, it's also the most functional. The TAG TECSLATE comes standard with Wifi and Bluetooth capability, a Blu-ray/DVD player, a high-definition camera, a keyboard, a stylus set, a wall mount, and a comprehensive remote. The ability to adapt makes the TECSLATE the most fitting addition to any top-of-the-line backdrop.

Where connectivity is concerned, gadget aficionados will find the right link via a VGA port, a touch port, USB ports, audio in/out, and Ethernet. On day 1 the TECSLATE is ready by simply plugging in one cord to an outlet to impress the competition or just let your guests kick back and unwind with the latest 3-D entertainment.

The capstone for any first-class experience, the TAG TECSLATE delivers what the imagination can create with tomorrow's cutting-edge technology capabilities today.
