

The rugged design

TAG GD3030

boosts efficiency in critical circumstances.

The TAG GD3030 is the latest 10.1" IP65 Windows® tablet equipped with new features and multi-functional inputs for stationary and mobile applications. It includes long battery life, no gap communication, unrivaled viewability, and a superb powerful display. The TAG GD3030 rugged tablet provides Public Safety with a mobile hardware solution that enables data to be captured and processed at the scene instantly. The rugged design is built for all types of environments, so your data is protected against failure in critical emergency situations.

RUGGED. DURABLE. POWERFUL.
